EDUCATION

McMaster University

Hamilton, ON

Bachelor of Engineering | Software Engineering

- Cumulative GPA: 3.3
- Relevant Courses: Digital Systems, Data Structure and Algorithm, Discrete Math, Intro to Software Development, Software Development Basics, Computer Architecture

EXPERIENCE

McMaster Delta Hacks XI

Jan 2025 – Jan 2025

McMaster University

Hamilton, ON

- Joined 24-hour hackathon at McMaster University with 600+ other contestants from all around Canada.
- Developed “**Nutrilens**”, a web application that allow users to take a quick snapshot of their food and get the information they need about the food that they consume (calories, carbohydrate, fat, allergies, etc...).
- Using **ReactJS** for frontend, **Flask**, **Python** and **NodeJS** for backend and fetch the API from “Nutritionix” for food data and **OpenCV** and **TensorFlow** for camera recognition.

Sumobot Competition

Jan 2025 – Jan 2025

McMaster University

Hamilton, ON

- Designed and 3D-printed the structural components of a robot for optimal durability and performance
- Assembled and integrated hardware components, including sensors and motors, to ensure precise functionality
- Collaborated with a team to build and troubleshoot sensors data for programming
- Implemented the bot movement algorithm using **Arduino**, ensuring precise navigation

PROJECTS

Personal Portfolio

May 2024 – Present

McMaster University

Hamilton, ON

- Developed a responsive portfolio that represents my traits, skills, socials and personality.
- Utilize **ReactJS** framework with **CSS** to build the frontend and **JavaScript** to make the website functional.
- Learned to design layouts and deploy web pages via gh-pages branch.

Snake And Ladders Game

Nov 2024 – Dec 2024

McMaster University

Hamilton, ON

- Snake And Ladders game developed using **C** and **GTK** for GUI in Linux environment.
- Automate GitHub commit and push using **Bash Scripting**.
- Wrote test cases for bugs test and run GCOV report to evaluate the code coverage.
- Created .YML file for the CI Pipelines to automate the build, test and deployment of code with GitHub Actions.

Tic-Tac-Toe

Dec 2024 – Dec 2024

McMaster University

Hamilton, ON

- Tic-Tac-Toe game developed with **Java** and **Apache Maven** ran in terminal with text-based format.
- Learned and be able to apply **Object Oriented Programming** Principles within the program.
- Applied data structures and algorithms knowledge to detect the winning combinations and created computer player that play with strategies like human.

SKILLS

- Languages: English, Vietnamese
- Programming: Python, Java, HTML, CSS, JavaScript, MATLAB, Bash, C, Verilog
- Tools and Framework: ReactJS, Tailwind CSS, Bootstrap, Vite, Linux, Git, GitHub, TensorFlow, Matplotlib, GTK
- Development Tools: Apache Maven, Vim, VS Code, Jupiter Notebook, PyCharm, PowerShell, Ubuntu, Anaconda
